

Transform Your Salon Into a Full-Service Spa

With high competition in the marketplace, service diversification is a necessity. Current trends point to all-inclusive salons, requiring smaller salons to add services yet try to avoid the high investment costs often required. The **SpaBed™** is the perfect addition to any salon because it's:

- **Cost Effective:** Since the **SpaBed** is user operated, no profit splitting or additional payroll charges are associated with this unit. Additionally, the **SpaBed** costs only pennies per session to operate.
- **Profitable:** The **SpaBed** will help increase your client base. Since initial investment is very reasonable, your business will realize a profit in a few months.
- **Convenient:** The **SpaBed** is always ready to use, so there is no need to worry about scheduling or the problems that sometimes arise from missed appointments or conflicting schedules.

Through powerful, rotating jets, the **SpaBed** produces a deep, penetrating massage that is designed to reduce stress and tension. Because of unique jet placement, full-body flotation, and heated water and air, the **SpaBed** will give your customer a rejuvenating, soothing massage in minutes, all for a fraction of the cost of a traditional massage. Your clients will appreciate its convenience and monetary savings—and the gentle, soothing massage they receive.
